TABLE OF CONTENTS

1. Agenda
2. Biographies of the Members of the Select Committee

Panel #1 Overview of California Law and Other States

1. Dean Schillinger M.D., California Diabetes Program, Department of Public Health
2. Marcia Bryant, Southwest Washington Medical Center, Washington State

Panel #2 School District Policies & Procedures

1. James Woods, Reed Smith, LLP
2. Barbara Wilson, Pittsburg Unified School District
3. ReJois Frazier-Myers, Pittsburg Unified School District
4. Lenore Silverman, Fagen, Friedman & Fulfroost, LLP

Panel #3 Implementation of Current Law

1. Diane Durando, California School Nurses Organization
2. Martha Penry, California School Employees Association
3. Teresa Brown, California Teachers Association
4. Wendy Gallerani, Parent

APPENDIX

1. Text and Assembly Floor Analysis of AB 942 (Leno) (Chapter 684, 2003)
2. K.C. Settlement Agreement & Legal Advisory
3. 2009 Public Records Act Request of California school districts relating to:
 - a. Policies in place for care of children with diabetes
 - b. Number of nurses and LVNs
 - c. Number of children with diabetes
 - d. Number of children with HCP plans
4. October 2008 California Department of Education data summarizing the number of licensed nurses in K-12 school districts
5. California School Board Association's Board Policy for "Administering Medication and Monitoring Health Conditions"
6. Pittsburg Unified School District, Office of Student Services, "Diabetic Student Support"
7. Pacifica School District policy for "Administering Medication and Monitoring Health Conditions"

**Assembly Select Committee on Child/Adolescent Health and Safety
Isadore Hall, III, Chair**

**Our Kids, Their Health:
Addressing Childhood Diabetes in Schools**

**State Capitol, Room 447 – Sacramento, CA
November 4, 2009**

AGENDA

- 1. Welcome and Opening Remarks**
 - a. Chair, Assemblymember Isadore Hall, III
 - b. Members of the Committee
- 2. Overview of California Law and Other States**
 - a. Dr. Dean Schillinger M.D., California Diabetes Program
 - b. Marcia Bryant, Southwest Washington Medical Center, Washington State
- 3. School District Policies & Procedures**
 - a. James Woods, Reed Smith, LLP
 - b. Dr. Barbara Wilson, Pittsburg Unified School District
 - c. ReJois Frazier-Myers, Pittsburg Unified School District
 - d. Lenore Silverman, Fagen, Friedman & Fulfroft, LLP
- 4. Implementation of Current Law**
 - a. Martha Penry – California School Employees Association
 - b. Teresa Brown – California Teachers Association
 - c. Diane Durando – California School Nurses Organization
 - d. Wendy Gallerani – Parent
- 5. Questions from Committee Members**
- 6. Public Comments**
- 7. Closing Remarks**

Assistant Speaker pro Tempore Isadore Hall, III
52nd Assembly District
Biography

Assemblymember Isadore Hall, III was elected in November 2008 to represent the 52nd Assembly District that includes Compton, Paramount, Rancho Dominguez, South Los Angeles, Watts and Willowbrook. Within days of taking office, Hall was appointed to Assembly Speaker Karen Bass' leadership team and currently serves as Assistant Speaker pro Tempore.

Hall currently serves as the Chair of the Assembly Select Committee on Child/Adolescent Health and Safety and serves on the following fiscal and policy committees: Appropriations, Governmental Organization, Health, Human Services and Rules. Hall also serves on the following Joint and Select Committees: Select Committee on Community Colleges; Select Committee on Domestic Violence; Select Committee on Safety and Protection of At-Risk Communities in California; Select Committee on Regional Approaches to Addressing the State's Water Crisis and the Joint Committee on Fairs, Allocation and Classification.

Hall began his career of public service in 2001 when he was elected to the Compton Unified School District Board of Trustees. Hall served two terms as President of the Board and oversaw important reforms to attract highly qualified teachers and increase funding to classrooms throughout the district.

While on the Board of Trustees, Hall championed Measure I, which secured \$80 million to renovate schools throughout the district. He was also instrumental in securing construction of the first new elementary school built in the City of Compton in 35 years and successfully restoring the Compton Unified School District to full local control, after ten years of management by the State of California.

Hall was elected to the Compton City Council in 2003 where he served in various leadership positions including Mayor Pro Tem. While on the City Council, Hall oversaw efforts to increase youth access to parks and recreational activities, reduce crime and promote business growth throughout the city.

Among Hall's successes on the City Council, he created the quarterly Business-2-Business Breakfast Roundtable, which promoted commercial and residential development throughout southern California. Through his work on the Compton City Council, Hall also served on the Metropolitan Water District Board, the Gateway Cities Council of Governments and the Southern California Association of Governments becoming an influential regional voice for communities throughout southern California.

Hall received a Bachelor of Art's Degree in Business Administration from the University of Phoenix and a Master of Arts Degree in Public Administration from National University. Hall is also a proud member of Omega Psi Phi Fraternity, Inc.

Born and raised in Compton, California, Hall is the youngest of six children.

Assemblymember Joe Coto
23rd Assembly District
Biography

Assemblymember Joe Coto (D- San Jose) is currently serving his third term in the California Assembly. His agenda in the Legislature continues to focus on making California's schools the best in the nation. He is also striving to ensure that all of California's children have health insurance and are provided with the ability to experience the American dream. This dream includes going to college, securing a good paying job, and owning a home.

A lifelong Democrat, Coto proudly represents the 23rd Assembly District in San José. The District includes the east side, downtown and the Monterey Road corridor. The 23rd District represents about half of the city of San José.

Mr. Coto recently completed a 2 year term serving as Chair of the 26 member Latino Legislative Caucus, prior to becoming Chair he served 2 years as the Vice Chair. The Latino Caucus is seen as one of the most influential in the legislature. The Caucus' focus is primarily on improving the quality of life for working families in California. With over 35 % of the population in California being Latino, the issues affecting them, affect all Californians. The key legislative priorities identified by the Latino Caucus are: Education, Health, Housing, Economic Development and Leadership.

Assemblymember Coto was also appointed by the Speaker of the Assembly to serve as Chair of the Insurance Committee. In addition, he serves on the following committees: Elections and Redistricting, Governmental Organization, Revenue and Taxation and the Joint Legislative Audit Committee. Mr. Coto also chairs the Select Committee on Urban Education.

Joe Coto began his career as a teacher in the Oakland Unified School District. There, he experienced first hand the influence of public policy on education. While he was in Oakland, Mr. Coto was elected as an Oakland City Councilmember and served in that capacity for four years. He returned to education and ultimately became the Superintendent of the Oakland schools. In 1988 he accepted the position of Superintendent of the East Side Union High School District in San José and served the East San José community for 14 years. Mr. Coto has a lifetime commitment to the advancement of all students and their families. In recognition of his contributions as superintendent of the East Side Union High School District and beyond, the Association of California School Administrators (ACSA) named him the 2003 'Superintendent of the Year'.

During his tenure as Superintendent, Mr. Coto used his leadership and experience to craft policies that reached beyond the East Side Union High School District. Coto organized the East Side Consortium of school districts which led to the approval of SB 1051, the Voluntary Integration Program. Since its inception, the program has brought over \$100 million for participating districts and contributed to increased diversity and integration in East San Jose schools. During his tenure in the East Side Union High School District, Mr. Coto was able to bring nearly half a billion dollars in grant monies and improvement bonds to East San José.

In addition to his commitment to excellence in education, Mr. Coto has continued to serve the community by serving as Chair of the Mexican Plaza Cultural Arts Center in San José and as President of the Latino Democratic Forum. He has served on the boards of Joint Venture Silicon Valley and the Lucille Packard Children's Hospital.

A healthy community is one that builds on the strengths of all its residents. Joe Coto has demonstrated through a life of service and commitment, that he will empower and defend the people to maintain the building blocks of a strong and healthy community: jobs, quality education and affordable housing.

Joe and his wife, Camille, have 2 daughters.

Assemblymember Nathan Fletcher
75th Assembly District
Biography

Nathan Fletcher is the State Assemblyman representing California's 75th District. He is the first combat veteran of the Global War on Terror to serve in the California State Legislature. Assemblyman Fletcher serves as the Vice Chair of the Assembly Health Committee, the Select Committee on Biotechnology, and the Select Committee on Rail Transportation. He is a member of the Accountability & Administrative Review, Water, Parks, & Wildlife, and Housing & Community Development Committees. Additionally, he sits on the Select Committees on Foster Care, Child/Adolescent Health and Safety, Healthcare Workforce Access, and Safety and Protection of At-Risk California Communities.

In each of these legislative facets, the Assemblyman is committed to demanding transparency and accountability from government, creating new jobs in California, expanding the access and affordability of health care and working to solve the water crisis affecting the Golden State.

Fletcher was elected in 2008 and represents the city of San Diego communities of La Jolla, University City, Mira Mesa, Scripps Ranch, Rancho Bernardo, Rancho Peñasquitos, and Fairbanks Ranch, along with the City of Poway, portions of the City of Escondido, the community of Fairbanks Ranch and portions of Rancho Santa Fe.

Driven to serve, Nathan's passion has always been public service. Before being elected to the legislature he served in the military, in the community, and in the political arena.

In 2007, Assemblyman Fletcher completed his service in the United States Marine Corps Reserves where he served as a Counterintelligence/Human Intelligence Specialist. On his last deployment, Nathan worked in the Horn of Africa region traveling throughout Eastern Africa and the Near East. For his service he was awarded the Joint Service Commendation Medal and Global War on Terrorism Expeditionary Medal.

In 2004, Nathan served eight months in the Sunni Triangle region of Iraq. Among the awards he received from this tour of duty are the Navy/Marine Corps Achievement Medal with Combat "V" for valor, the Combat Action Ribbon, and the Iraqi Campaign Medal. Fletcher is a recipient of additional military awards including the Benton R. Montgomery Award for Excellence and the Walter Morris Honor Graduate Award. Nathan is a graduate of many military training schools including the US Army Airborne Course and Marine Corps Mountain Warfare Training Center.

In addition to his military service, Nathan has been a tireless advocate for America's veterans and is a life member of both the American Legion and Veterans of Foreign War. Before being elected to the state legislature Nathan served as an appointed member of the San Diego County Veterans Advisory Council, where he provided a strong voice for veterans of the Global War on Terror. Assemblyman Fletcher also served on the Board of Directors for the Marine Corps Recruit Depot Historical Society.

In addition to being politically active in California and nationally, Nathan is a champion for the democratic process and has spent time abroad working with philanthropic non-governmental organizations to build and improve democracies in East Timor, Cambodia and Serbia.

Nathan is an Ironman Triathlete, marathon runner, and avid outdoorsman who enjoys surfing, alpine mountaineering, and mountain biking. He is a graduate of California Baptist University, where he was a Presidential Merit Scholar and member of the CBU baseball team.

Fletcher lives in San Diego with his wife, Mindy, who recently served as Deputy Campaign Manager and Deputy Chief of Staff for Governor Arnold Schwarzenegger. Nathan and Mindy are members of Community Bible Church and proud parents of their son Zach.

Assemblymember Bonnie Lowenthal
54th Assembly District
Biography

Assemblymember Bonnie Lowenthal was elected in November 2008 to represent the 54th District of over half of the City of Long Beach, the San Pedro area of Los Angeles, and all of the Palos Verdes peninsula.

As an Assemblymember, Lowenthal will continue her work to advocate for affordable housing, rights for the disabled, and transparency in government. She is also passionate about ensuring public safety, promoting economic development, protecting the environment, creating more parks and green space, ensuring that our historic places are preserved for future generations and that our public infrastructure is well funded and effectively maintained.

Prior to her service in the Assembly, Lowenthal was elected to represent the First Council District of the City of Long Beach in 2001, and was selected to serve as Vice Mayor in 2006. Lowenthal also served on the Long Beach Unified School District Board of Education for seven years and was a member of the Los Angeles County Metropolitan Transportation Authority (MTA), as well as many community boards and committees.

As a Councilmember, Lowenthal was honored with:

- CentroCHA's Education Award for her longstanding efforts on behalf of the Hispanic community;
- The Interfaith Community Organization's Housing Hero Award in recognition of her advocacy on behalf of those in need of housing.
- The Environmental Hero Award by the Algalita Marine Research Foundation and Long Beach Organic;
- The Women of Distinction award from Soroptimist International; and
- The Excellence Through Leadership Award from ILWU Local 13, among others.

Having served as a bilingual mental health consultant for the League of United Latin American Citizens (LULAC), HeadStart, and the Centro de la Raza, Lowenthal is acutely aware of the needs of the community, and will work every day on their behalf.

Assemblymember Lowenthal received her Bachelor of Science degree from the University of Wisconsin and a Master's of Science in Community and Clinical Psychology from CSU Long Beach. Since 1975, Lowenthal has been a licensed family counselor and mental health consultant.

**Assemblymember Nancy Skinner
14th Assembly District
Biography**

In November 2008, Nancy Skinner (D-Berkeley) was elected to represent the Bay Area's 14th Assembly District. The district includes Albany, Berkeley, El Cerrito, Emeryville, Kensington, Lafayette, Moraga, Orinda, Pleasant Hill, Richmond, San Pablo and parts of Oakland and El Sobrante.

As a freshman legislator, Assemblymember Skinner was named Chair of the Natural Resources Committee. The Committee's jurisdiction includes water and air quality, recycling, waste management, energy issues including efficiency, power plant siting, and energy development, oil spills, wild and scenic rivers, forestry, open space conservation and, oversight of California's global warming solutions act.

Assemblymember Skinner brings to the Assembly experience as a small business owner. Early in her career, she served on the Berkeley City Council and was responsible for many of Berkeley's groundbreaking environmental policies, including initiating economic development strategy and waterfront protection policies. Her introduction of Berkeley's 1988 ban on Styrofoam was the first in the nation.

A nationally renowned leader in the fight against global warming, she founded ICLEI-Local Governments for Sustainability, an organization dedicated to helping local governments around the world become environmental leaders. As Executive Director of ICLEI's U.S. office, she launched the Cities for Climate Protection Program, the national movement of Mayors and cities working to reduce greenhouse gas emissions that now involves over 500 cities and counties.

As the U.S. Director of The Climate Group, Assemblymember Skinner worked with Fortune 500 companies, clean tech industries and state and national leaders to pass groundbreaking legislation such as California's global warming bill, AB 32. With a team of writers at Earthworks Press, she also wrote and published the best selling book series 50 Simple Things You Can Do To Save the Earth.

Prior to being elected to the State Assembly, Assemblymember Skinner served on the Board of the East Bay Regional Parks District. With 100,000 acres of parklands and open space, the District is the largest urban park system in the United States. There, she worked to protect open space, add acres of additional parks, and expand recreational opportunities for youth and schools.

Assemblymember Skinner is also a Member of the Utilities and Commerce, Public Safety, Local Government, and Appropriations Committees.

Assemblymember Skinner received both her Bachelor of Science degree in Natural Resources and her Masters in Education from University of California, Berkeley. Her husband, Lance Brady, is retired from the Information Technology Office at the City of Berkeley and her daughter Sirona is a chef in Oakland.

Panel #1 Overview of California Law and Other States

1. Dean Schillinger M.D., California Diabetes Program,
Department of Public Health
2. Marcia Bryant, Southwest Washington Medical
Center, Washington State

Dr. Dean Schillinger
California Diabetes Program
California Department of Public Health

Dean Schillinger, MD, is Chief of the California Diabetes Program in the California Department of Public Health, a practicing Primary Care Physician at San Francisco General Hospital, and a Professor of Medicine at University of California, San Francisco (UCSF). He also serves as Director of UCSF's Center for Vulnerable Populations, a pioneering research center committed to transforming clinical and public health practice and policy to improve health and health care for socially vulnerable people.

Dr. Schillinger, who has authored more than 75 research papers, has focused his research on health care for vulnerable populations. A number of his studies explored the impact of limited health literacy on the care of patients with diabetes and heart disease. He was honored with the Institute for Healthcare Advancement Research Award for this work.

Most recently, he was awarded the first annual Health Literacy in Advancing Patient Safety Award for developing a computer tool to help doctors and patients manage medications.

Marcia K. Bryan RN/CDE

I have been a registered nurse for 37 years, most of those years as a pediatric nurse. I work at Southwest Washington Medical Center in Vancouver, Washington.

Twenty three years ago I became interested in diabetes and diabetes education when my 2 ½ year old daughter, Stephanie, was diagnosed with type 1 diabetes in 1986.

I have taught families and patients about the importance of good diabetes management for many years and received my accreditation as a Certified Diabetes Educator (CDE) in 2004. My job includes both out-patient and in-patient 1:1 education and teaching diabetes classes. I have taught hundreds of patients of all ages how to manage their diabetes. This includes healthy eating, blood glucose testing and insulin administration and keeping diabetes in as good of control as possible to avoid complications. I am also a certified insulin pump trainer.

I have served on the Gales Creek Camp for Children with Diabetes board of directors for 17 years and worked to develop the Family Camp program at Gales Creek Camp.

Over the years I would educate the school staff about my own daughter's needs as a student with diabetes. Although I was fortunate to have great cooperation by the school staff there were no laws to protect the students with diabetes to make sure their diabetes needs were met and staff was trained to provide them a safe diabetes management plan. Many of the families at camp and the support group would have frightening stories about dangerous situations at school. That changed in 2002 when Washington State put in place state legislation to help schools, families and students safely manage diabetes in the schools.

I have worked with the American Diabetes Association of Oregon and SW Washington for several years to help provide training to school staff so they can safely help the students manage their diabetes at school. This training includes Diabetes Basics, recognizing high and low blood sugars and treating them, emergency care, including administering Glucagon for unconscious low blood glucose. The training can also include the administration of insulin or assisting the student with an insulin pump.

The Free Clinic of SW Washington is another program that I actively support. I have worked with both the pediatric immunization program and in helping patients without financial resources or insurance obtain needed diabetes medication, supplies and medical care and education.

Panel #2 School District Policies & Procedures

1. James Woods, Reed Smith, LLP
2. Barbara Wilson, Pittsburg Unified School District
3. ReJois Frazier-Myers, Pittsburg Unified School District
4. Lenore Silverman, Fagen, Friedman & Fulfrost, LLP

James Woods
Reed Smith, LLP

Jim is a member of the Life Sciences Health Industry Group, practicing in the area of product liability litigation. For more than 30 years, Jim has focused on the representation of manufacturers of prescription medicines and medical devices. His practice has involved representing and counseling manufacturers of prescription products involving a variety of issues. These have included recalls of prescription products, marketing and promotion of these products, first amendment issues in marketing these products, off-label issues, preemption, product liability issues and the reuse of single use medical devices.

Based upon this experience, he recently co-authored a book titled *Recalls of Prescription Products: A Proactive Primer* which details planning for and implementing the recall process for all regulated products. Jim currently serves on a task force seeking to develop a national policy for the development of and liability protection for vaccines.

He has served as regional counsel for an international medical device company in a product liability action and was the multi-district litigation liaison counsel in the Gammagard® MDL litigation.

Jim's practice has given rise to a number of landmark decisions involving prescription products, medicines, devices and vaccines, including:

- *Kelly Morson v. The Superior Court*, 90 Cal. App. 4th 775, 109 Cal. Rptr. 2d 343, holding that the consumer expectations test could not be applied to claims in which users of medial devices such as natural rubber latex gloves alleged that the regulated device contained chemical substances that were of a toxic nature, and that exposure to the device had caused users' harm;
- *Boaz, et al. v. Boyle & Company, Inc., et al.*, 40 Cal. App. 4th 700 (1995). The California Court of Appeal affirmed the dismissal of personal injury claims brought against pharmaceutical manufacturers on grounds of *forum non conveniens*, even though the non-resident plaintiffs could not recover under any legal theory in their resident states;
- *Brown v. Superior Court*, 44 Cal. 3d 1049 (1988), refusing to apply strict liability to measure a manufacturer's liability for injuries because of the public's interest in the development, availability and reasonable price of prescription drugs;
- *Jolly v. Eli Lilly and Company*, 44 Cal. 3d 1103 (1988), defining the issue of when the statute of limitations begins to run for an injury arising from the use of a pharmaceutical;
- *Sheffield v. Abbott Laboratories*, 144 Cal. App. 3d 583 (1983), refusing to extend the *Sindell* market share theory of liability to the Salk polio vaccine;
- *Sindell v. Abbott Laboratories*, 26 Cal. 3d 588 (1980), creating the market share theory of liability;

- *McCreery v. Eli Lilly and Company*, 87 Cal. App. 3d 77 (1978). The California Court of Appeal held that the plaintiff could not maintain a strict liability action against a pharmaceutical manufacturer where she was unable to identify the specific manufacturer of the product.

Jim is listed in *The Product Liability Expert Guide*, the inaugural issue of *Who's Who Legal – Product Liability Lawyers 2009* and the 2nd Edition of *The Guide to the World's Leading Product Liability Lawyers*. For the sixth consecutive year, he also has been listed in *The International Who's Who of Business Lawyers 2009* and *Northern California Super Lawyers 2009*. In 2006, Jim was the recipient of the Hero Award from the AIDS Legal Referral Panel for having donated 'extraordinary amounts of time and expertise to protect the legal rights of Bay Area residents living with HIV and AIDS.'

In 2006, Jim was named as the winner of Reed Smith's annual Sean Halpin Award for outstanding pro bono accomplishments. The annual recognition was established by the firm to honor Sean Halpin, an outstanding young partner in its Philadelphia office who died in 2004. A recipient is selected annually by the Reed Smith Pro Bono Committee from nominees who have made significant pro bono or other community service contributions during the previous year. The same year, he was named "Attorney of the Year" by the AIDS Legal Referral Panel.

In addition to his other pro bono activities, Jim led a team of Reed Smith attorneys in representing the American Diabetes Association as well as four families with children with diabetes in a class action against the California Department of Education. The litigation resulted in a settlement that ensures California students who are classified as disabled because of diabetes will be safe at school and enjoy the same legally-required educational opportunities as their peers. The agreement also clarifies the rights of eligible students with diabetes in every school district throughout the state. (Reed Smith's representation continues after a variety of nursing organizations have sued to set the settlement aside). Due to his tireless efforts in this matter, Jim was recognized by the *California Lawyer* "Angel Awards" in 2007 as one of the state's outstanding Pro Bono attorneys.

Assembly Member Isadore Hall
State Capitol
P.O. Box 942849
Sacramento, CA 94249-0052

My name is James M. Wood. I am an attorney – a litigator and trial lawyer – practicing with the law firm of Reed Smith. I have been active in the practice since I was first licensed by the State bar in 1973 and have specialized in representing manufacturers of prescription products.

During the past 35 years perhaps one of the most satisfying – and frustrating – cases I have worked on is the litigation representing together with Disability Rights Education and Defense Fund the American Diabetes Association and every school child with diabetes in the state.

Four years ago the firm became jumped at the opportunity to work to ensure that every child with diabetes receives the healthcare they are entitled to and to receive the identical education that their classmates received during the school day.

Over the next four years we dedicated ourselves to find a solution. Our team of attorneys, paralegals and medical analysts has worked more than 6,500 pro bono hours with a fee based value of more than \$2 million dollars. During these four years we filed a class action against two school districts and the Department of Education; we negotiated a settlement with the districts and the department that resulted in the creation of the current Legal Advisory; together with DREDF we represented dozens and dozens of parents in finding care for their children in individual schools; we continue to represent the American Diabetes Association in the pending appeal before the Third district following the issuance of a writ to set aside the Legal Advisory. And we continue to work with CDE and the diabetes community to find a solution.

And that is why I am grateful to you today to allow me to testify about what it is that I have learned about diabetes care in California's schools. And in shaping my testimony I have followed my practice as a litigator to acknowledge that once an issue is clearly and precisely defined the solution will appear.

Let me share with you what it is that I have discovered in our representation of ADA and families of children with diabetes. Today I will address why care for children with diabetes in California schools is at best chaotic and at worst dangerous to their health

First and foremost, there is much that every one of us involved with the care of children with diabetes can agree to:

1. RNs and LVNs are always the first choice to administer insulin to a child with diabetes,
2. Despite this noteworthy goal, California has one of the lowest numbers of school nurses in the country. The United States Department of Health and Human Services suggests a standard of 1 nurse for 750 students.¹ California has a ratio of 1 nurse to 2,700 students which ranks it 43 out of 50 states. (October 10, 2007, ANA Press Release Announcing Lawsuit to Challenge settlement of case to provide care to children with diabetes.²) Because there are three times as many students as recommended by HHS there are three times as many students whose health is at risk in California public schools. Also, nearly half of all school districts in California have no school nurse at all³. See State of California Education Profile, FY 2005 – 2006, California Department of Education.
3. Unpredictable fluctuations in blood glucose levels can impact concentration and comprehension, as well as have significant and potentially life-threatening short and long term health implications on children with diabetes.
4. The Office for Civil Rights of the United States Department of Education has found that students with diabetes to be “disabled” under Section 504. And with this disability three federal laws require that they receive care for their condition during the course of the school day: Section 504 of the rehabilitation Act, the Americans with Disabilities Act and the Individuals with Disabilities Education Act
5. Parents/guardians can lawfully identify and designate a volunteer unlicensed individual to administer insulin; and,

¹ School Health Policies and Programs Study (SHPPS), CDC, NCCDPHP.
<http://www.cdc.gov/HealthyYouth/shpps/index.htm>.

² See <http://nursingworld.org/FunctionalMenuCategories/MediaResources/PressReleases/2007/ANAANACaliforniaFileLawsuitAgainsttheCaliforniaDepartmentofEducation.aspx>.)

³ See State of California Education Profile, FY 2005 – 2006, California Department of Education.

6. Written authorization of the Health Care Provider should always be required for the administration on insulin in school

The single point of disagreement and the single source of chaos about care for children with diabetes is who can administer insulin when, for whatever reason, a licensed healthcare provider is not available to timely administer the therapy.

In June of this year we sent a Public Records Act request out to every school district in the state) – to date we have received 295 responses. In these responses we see the kernel of a solution.

From these responses we learned about a policy that the California School Board Association has created as a model for care for children who need to take medicines as prescribed by the child's doctor during the school day. This model is commonly referred to as School Board Policy 5141.21. This model has these elements based upon Ed. Code § 49420-49425; § 49480:

A designated school employee may administer medication during the school day when **both** the physician and parent(s) or guardian make a written, detailing the method, amount, and time the medication is to be taken.

Medication will be administered only to students whose parent and physician deem it necessary for potentially life-threatening medical conditions or for those who need medication administered during the school day in order to interact appropriately at school.

This policy is consistent with state law. When necessary it is lawful for the school volunteer to be trained by a licensed health care professional⁴

⁴ The NPA expressly confirms that various nursing tasks can be performed by non-licensed personnel in certain specified circumstances. Three of these exceptions are particularly relevant to the care of students with diabetes. First, Cal. B&P Code §§ 2727(a) excludes "gratuitous nursing of the sick by friends or members of the family" from the definition of nursing under the NPA. This makes clear that the NPA does not limit the ability of an individual (or in the case of a minor child, the parent or guardian) to choose individuals from the community to provide care, so long as the individuals so chosen are not directly compensated for the nursing task. Nothing in the language of this exception restricts the parent's ability in this situation to designate an employee of the school district, as opposed to a babysitter or neighbor.

Continued on following page

Let me provide some specifics from the responses:

1. An overwhelming majority – more than 161 districts – already have some form of 5141.21 in place;

2. Most of these are similar to the policy of Compton Unified School district. Compton's response shows that there are 8 school nurses available to 34 schools - 3 high schools, 8 Middle schools, and 23 elementary schools. 32 children in Compton's schools have diabetes. The district has a form of 5141.21 in place permitting parents to designate and authorize unlicensed and trained individual to administer insulin when needed. The district's guidelines are based on one that "encourages all measure sand actions that contribute to a better management of diabetes tin the school and recommends a cooperative and collaborative approach by all stakeholders to ensure that children with diabetes are able ot manage their diabetes in the school setting without being excluded or discriminated against" – Compton provides a form for an MD request for designation of school personnel to administer medicine.

3. Many other school districts permit a parent to designate an appropriately trained unlicensed individual to administer insulin. These include: Visalia Unified; Napa Valley Unified;

Continued from previous page

Second, Section 2727(d) permits persons other than nurses to provide nursing services in case of an emergency. Nothing in the statute indicates that an emergency cannot include a situation where a child requires immediate administration of medication to avoid serious health consequences.

Finally, Section 2727(e) is directly applicable to the administration of insulin by appropriately trained personnel in the school setting. Section 2727(e) authorizes and generally excepts from the restrictions of the NPA: "The performance by any person of such duties as required in the physical care of a patient and/or carrying out medical orders prescribed by a licensed physician; provided, such person shall not in any way assume to practice as a professional, registered, graduate or trained nurse." The focus here is on the act of holding oneself out as a nurse, not on the specific acts performed under the orders of a physician.

The California Education Code separately authorizes the administration of medication by trained school personnel in the school setting. California Education Code section 49423 entitled "Administration of Prescribed Medication for Pupil" provides:

Subdivision (a) states:

"Notwithstanding section 49422, any pupil who is required to take, during the regular school day, medication prescribed for him or her by a physician or surgeon, may be assisted by the school nurse or other designated school personnel or may carry and self-administer prescription auto-injectable epinephrine if the school district receives the appropriate written statements identified in subdivision (b)."

While section 49423 does not specifically state who will designate the individuals to participate in medication administration, it would not prohibit the parent, rather than the school district, to designate those individuals.

Saddleback Valley Unified ; Brentwood Union Elementary; Valley Center-Pauma Unified; Chico Unified; Lucia Mar Unified; Red Bluff Union Elementary; Lancaster Elementary; Alpine Union Elementary; Moreno Valley Unified; Kerman Unified; San Dieguito Union High; Sunnyvale; Rancho Santa Fe Elementary; McFarland Unified; Long Beach Unified; Outside Creek Elementary; Stockton Unified; Chaffey Joint Union High; Placer Union High Placentia-Yorba Linda Unified;

The approaches by these districts is consistent with what medical experts believe that proper diabetes management at school is safe, easy to implement, and minimally disruptive. These experts have explained that, with minimal training, school employees who are not health care professionals can safely administer glucagon and insulin. In fact, many states require or allow school personnel to administer analogous injections for diseases such as allergies and epilepsy. Therefore, medical experts believe schools can, and should, facilitate all facets of proper diabetes management. Many of these medical recommendations are summarized in the U.S. Department of Health and Human Services' publication, "Helping the Student with Diabetes Succeed: A Guide for School Personnel" (the "Guide"). Published in 2003, this 82-page publication carries the endorsement of nineteen prominent health and education organizations and government agencies.

We have also learned, despite the CSBA policy of encouraging parent designation this goal has been frustrated by misinformation sent by a variety of nursing associations. For example, The May ANA/C journal - "Not A Nurse? You Don't have to administer Insulin. . . . No Matter where you work" written by Maureen Cones, counsel for ANA. It warns: "If you are not a licensed nurse and have been asked or required to administer insulin in you school district, please notify the Board of Registered Nursing. . ." The article was produced by a district as a reason why they follow "nurse only" rule in its district.

The position taken by the Board of Registered Nursing has also had a chilling effect on the voluntary implementation of parent designation :

School Nurse Practice: Until the issue is resolved, the school nurse is required to adhere to the Nursing Practice Act and should. . .

3. Notify the CDE and the BRN if instructed to train an unlicensed person to administer insulin and an exhaustive effort has not been made to have an appropriately licensed person administer it.

Perhaps because of these positions taken by BRN and various nursing organizations we have learned that there is not a singular, consistent, uniform approach among the 1046 school districts in this state to caring for children with diabetes. Many have no policy at all (and this usually coincides with the absence of a school nurse); while many (at least 24) require that only school nurses administer insulin, thereby creating the high probability that care will not be given unless a parent leaves work to give their child a shot.

Here are some of the more dramatic examples of schools which have a nurse only policy:

1. Alameda - Dublin Unified 11 children with diabetes , 4 504, 1 IEP - 1 RN - 4 hours/day, 1 LVN 3 hours/ day, 1 LVN 1 hour per day - 5 E, 2MS, 2 HS
2. Orange - Orange Unified 49 children with diabetes all with HCP Nurse only 17 - 30 E, 5 MS - 4 HS
3. Stanislaus Turlock Unified - 34 children with diabetes, 3 with 504, 3 with IEP Nurse only - 5141.21, 5141.33 - only nurses administer meds as noted by BRN 5 RNS, 1 on call LVN for 18 schools
4. Los Angeles - Lynwood Unified - guided by BRN – 13 children with diabetes - 1 RN - 2 LVN
5. Contra Costa Oakley Union Elementary 8 49 children with diabetes -all with 504 Nurse only - various 1 - 24 hrs/week
6. Alameda- Hayward Unified - 35 children with diabetes, 32 with 504 - Nurse only except in emergencies, 5141.21 8.4 FTE
7. Ventura -Simi Valley Unified - 62 children with diabetes, 1 with 504, 8 with IEP Nurse only Various - has a manual on diabetes - training and designation not permitted - nurse only 7 for 20+ schools
8. Los Angeles- Pomona Unified - 55 children with diabetes, 8 with IEP, 5 with 504 PEDS - nurses only- 23.8 RN, 2 LVN - 29 Elemen; 6 MS; 6 HS
9. Los Angeles - Norwalk-La Mirada Unified - 52 children with diabetes. 6 IEP, 17 504 5141 Nurse only policy - 5 RNs for 6.5 hours, 4 LVNs for 8 hours, 8 others for 3.5 hours, 1 other for 3.75 hours, 2 others, for 3 hours 55 ins, 17 others for 6 hours, 9 others for 6.5, 2 others for 6.75, 7 others for 7 hours, 4 others for 7.5 hours, 1 other for 8 hours - - - - 18 elementary - 6 MS - 5 HS

10. Los Angeles - Baldwin Hills - 14 children with diabetes - 0 504 - Nurse only
8, 1 RN for Early Childhood - 7.5 hours for (13 Elementary of 20 schools)

One of the many impressive discoveries is that due to the lack of uniform statewide application of the law schools within the same counties contradictory policies as to whether unlicensed may administer insulin: Contra Costa: Brentwood Union: yes; Oakley Union no; Los Angeles: Lancaster and Long Beach yes, Pomona and Lynwood, no; Oranges County: Saddleback and Placentia Yes, Orange Unified, Irvine Unified and Fountain Valley No.

There is a solution and that is one that is statewide in its application, that reflects that for whatever reason there are not enough nurses to administer insulin when needed, and that unlicensed designees can be authorized and trained to administer insulin.

As noted by Christopher Goddard four years ago in *Children with Diabetes: Are State Statutes Needed to Protect Students' Rights?* 34 JLEDUC 497, legislation that applies to all schools in a state has these benefits:

First, state laws reduce administrative ignorance about diabetes management and the mandates of federal law. The very existence of these laws informs educators about diabetes and accommodations required under federal law (insofar as the state laws are tailored to comport with federal law-which they usually are). The implementation of these laws then reinforces school administrators' and other school employees' familiarity with diabetes and the scope of necessary accommodations.

Second, some of these state laws eliminate the disparity in diabetes-related policies among school districts by centralizing the creation of such policies in the state school-board. Under these laws, local school districts are charged with only implementing policies created by statewide committees or school boards, instead of creating their own policies. This centralization increases the uniformity of accommodations for students with diabetes, and reduces the chances that students with diabetes will be, for example, denied enrollment in their neighborhood school. These state-wide policies are also more likely than individual district policies to comport with Section 504 and the ADA, especially since many states turn to the American Diabetes Association for advice on the substance of their policies. Finally, state laws are an appropriate *proactive* means to root out systemic causes of discrimination. Schools, for example, have resisted training school personnel to administer glucagon injections for fear of legal liability, but state laws that immunize schools and their employees from legal liability for such actions proactively encourages schools to provide the accommodations mandated by federal law. Such measures encourage proper diabetes management at school.

We as a state can do better – we know the solution – and we simply have to step up to ensure that every child with diabetes receives the care that not only is mandated by federal law but also by a human sense of what is right. Until the day that there is a nurse in every school we must find ways – as many districts already have – to ensure that children with diabetes get the care that their condition mandates.

Dr. Barbara Wilson's Bio –

Currently Dr. Wilson is the Superintendent of the Pittsburg Unified School District.

Dr. Wilson is serving in her 11th year as a superintendent. Prior to serving in Pittsburg, she was the superintendent in Jefferson Elementary in Daly City and in the Larkspur School District in Marin County. She has a Ph.D. in Policy, Organization, Management and Evaluation from U.C Berkeley.

Dr Wilson was a special education teacher for 18 years, serving in Philadelphia, Bangkok, and Vallejo. Dr. Wilson is a former president of the California Association of Resource Specialists (CARS).

She also served in a Senate appointment for eight years on the California Advisory Commission on Special Education.

During her tenure on the Commission, in the mid-90's, she testified on behalf of the Commission to the legislature on this same issue.

Dr. Wilson's statement

I have served as the superintendent of three school districts and the assistant superintendent in a fourth. In none of these districts have we had the luxury of a school nurse. All of the required health screenings and consultations have been done through short-term contracts with independent nursing agencies.

There is no doubt that a district nurse would be an outstanding addition to our district. However, given the range of health needs and 12 campuses, it is unlikely that a nurse would be available to serve a diabetic child at the critical time of need. Many diabetic children need testing and/or insulin administration/supervision around the lunch hour. This would require that the nurse be at several places at the same time. If we were able to hire a district nurse, the role would likely be more of a case management and referral to external medical resources.

Diabetes management has been successfully done in our district by trained personnel, including principals, secretaries and teachers. This is not surprising since once students go home, there is no certified nurse on site to help them with their diabetes. We have not had a single incidence of diabetes mismanagement in our district.

A proposal to require nurses at each site where there are diabetic children is unreasonable, and likely an impossible standard to meet. There are not enough credentialed school nurses to meet this need. A check with the Commission on Teacher Credentialing would verify this. Additionally, school districts report that even when they do advertise for school nurses, the positions go unfilled for many months. That is because school district salary schedules cannot compete with nursing pay in hospitals and clinics.

Bio for Dr. Frazier-Myers

My name is Dr. ReJois Frazier-Myers. I am currently the Director of Student Services for the Pittsburgh Unified School District and teach English Learners at the Pittsburgh Adult Education Center. I have a Doctorate in Organizational Leadership and International Multicultural Education. I have Masters in Administration and Counseling, and ten teaching credentials. I have been a teacher for 18 years, Counselor/Dean for 4 years, Assistant Principal/Principal for 9 years, and Director of Student Services for 7 years.

I am an advocate for students with diabetes and I supervise the Pittsburgh Unified School District 504 plans. I personally have Juvenile Diabetes that I struggle with on a daily basis. I was raised in the housing projects of San Francisco. While working at the Pittsburgh Unified School District I have missed one and a half days of work due to illness. I have not allowed diabetes to get in the way of reaching my goals.

ASSEMBLY SELECT COMMITTEE ON CHILD/ADOLESCENT HEALTH & SAFETY

INFORMATIONAL HEARING ON OUR KIDS, THEIR HEALTH:
LEGISLATIVE SOLUTIONS TO ADDRESS CHILDHOOD DIABETES IN SCHOOLS

Thursday, October 6, 2009
1:30 PM to 4:30 PM

Mr. Chairman and Members of the Select Committee on Child/Adolescent Health and Safety:

Thank you for the opportunity to speak with you today. My name is Lenore Silverman and I am a partner with the law firm of Fagen, Friedman and Fulfroft. Our law firm represents over 300 school districts throughout California and we have one of the largest special education practices in the country. Through our clients, we are acutely aware of the controversy regarding the care of children with diabetes in our schools. Recent litigation has created ambiguity and uncertainty for school districts as to how to meet the needs of diabetic students and comply with the law. As attorneys advising school districts, our primary objective is to promote solutions that will assist our clients in providing safe, comprehensive care for the more than 15,000 students with diabetes in California.

On August 15, 2009, this Committee heard passionate and compelling testimony from a wide spectrum of stakeholders. I would like to review some of the key points raised by the panelists, which have created the present uncertainty for school districts:

- The California School Nurses Association opposes CDE's position that a voluntary school employee who is unlicensed, but who has been adequately trained to administer insulin pursuant to orders from the student's treating physician, may administer insulin at school in accordance with the student's Section 504 Plan or IEP.
- According to the California School Nurses Association, the Nursing Practice Act prohibits unlicensed personnel from administering insulin to school children, or from training or supervising unlicensed personnel to administer medication, such as insulin.
- However, for public school districts in California, there is an extreme shortage of nurses with hundreds of school districts unable to recruit nurses.
- California is facing an unprecedented fiscal crisis that has forced school districts to layoff teachers and staff, including school nurses.
- Currently, less than 50% of California school *districts* have a school nurse and California has one of the worst student-to-school nurse ratios in the country.

- Unlicensed school personnel *can* be trained to safely administer insulin at school.
- Dr. Francine Kaufman, on behalf of the American Diabetes Association, provided a compelling statement that, in her opinion, as a physician specializing in the treatment of children with diabetes, to a reasonable degree of medical and scientific certainty, non-medical persons can, and routinely do, safely administer insulin to children.
- The California Nursing Practice Act already allows for gratuitous nursing by friends or family members and authorizes unlicensed individuals and voluntary, trained school employees to administer insulin in an emergency, such as an epidemic or public disaster. (Business and Professions Code Section 2727 (a)(d).)
- Indeed, many of our students perform their own diabetes care including self-administration of insulin. Students with diabetes have individual health plans developed by physicians and reviewed by nurses that outline the treatment protocol for the administration of insulin.

While it would be wonderful to have a school nurse in every school, it is not a reality and parents of diabetic children cannot wait for this to happen. Legislation is necessary to resolve the current controversy. Modest amendments to the Nursing Practice Act and the Education Code should be made to allow school nurses to train and supervise school employees to administer insulin and other medications. As evidenced by the introduction of AB 1430 and AB 426 this year in the Legislature, there is a recognition that the issue is one of public policy and that existing laws must be reconciled in order to clarify the duties of both school nurses and school districts.¹ Until the controversy is resolved, the safety of our more than 15,000 students with diabetes in California is at risk.

The issue of whether unlicensed school personnel should administer insulin is not unique to California. According to a comprehensive report published by the Centers for Disease Control – National Center for Chronic Disease Prevention and Health Promotion; SHPPS: School Health Policies and Programs Study 2006, (available at www.cdc.gov/HealthYouth/SHPPS/), 75.5% of states have a policy related to who may administer medications, which often include insulin, to students at school:

74.5% of states allow administration by school nurses;

53.1% of states allow administration by teachers;

45.2% of states allow administration by school health aides; and

58% of states allow administration by other school staff.

¹ According to the author's office, AB 1430, "would require that any medication that is administered to a pupil who is required to take, during the regular school day, medication prescribed for him or her by a physician or surgeon be administered by a licensed healthcare professional operating within the scope compliance with the Nursing Practice Act." AB 426: This bill would require the State Department of Education, in consultation with the State Department of Public Health, the California Diabetes Program, and the State Department of Health Care Services, to recommend to the Legislature ways to address specific health-related needs of pupils on a school campus, by July 1, 2010.

Three states have regulations within nurse practice acts that allow for the delegation of administration of medication, and specifically insulin, in the school setting.² For example, in Utah, it is permissible for nurses to provide training to unlicensed assistive personnel to administer routine, scheduled or correction injection of insulin with requisite training. (Utah Nursing Practice Act, Administrative Code R156-31b-701(a)(2008).) Colorado has a similar provision in its Board of Nursing regulations.

In addition, Texas, Indiana and Virginia have adopted diabetes school care legislation that requires the establishment of a diabetes management and treatment plan, training school personnel who wish to volunteer as health aides to provide supplemental diabetes care, and allowing students the ability to monitor themselves in the classroom.

The administration of insulin by appropriately trained unlicensed school personnel has been endorsed by the American Diabetes Association, American Academy of Pediatrics, the American Medical Association, American Association of Clinical Endocrinologists, the American Association of Diabetes Educators, the American Dietetic Association, the Lawson Wilkins Pediatric Endocrine Society, the Pediatric Endocrine Nursing Society and U.S. Department of Health and Human Services.³ The American Diabetes Association has published a listing of states that have enacted specific provisions regarding diabetes care at school. The listing includes laws and regulations, including state Board of Nursing policies and/or guidelines that have been adopted to ensure the safety of students with diabetes in the school setting.⁴

With modest revisions to the California Nursing Practice Act and the California Education Code, the Legislature would provide much needed clarity to school personnel and school nurses, who are genuinely and equally concerned about the health and safety of the students in their care. A solution must be reached that is medically sound, fiscally prudent and realistically achievable. On behalf of public school districts in this state, we urge this Legislature to pass legislation allowing our school nurses to train and supervise school employees to administer insulin to diabetic students at school.

00002.00075/159049.1

**MARTHA PENRY
DIRECTOR, AREA A
CALIFORNIA SCHOOL EMPLOYEES ASSOCIATION**

Martha Penry serves on the Board of Directors for the California School Employees Association (CSEA), AFL-CIO, which represents over 230,000 classified school employees across California. Classified employees are the extraordinary workers who do the essential work in California's public schools. They are the school bus drivers, paraeducators, food service workers, custodians, school peace officers, health care assistants, school secretaries and other professionals working in pre-school, K-12, County Offices of Education and Community Colleges.

Martha has worked as a Special Education Paraeducator for over 20 years and currently works in the Twin Rivers School District in Sacramento County. She was also appointed by State Superintendent of Public Instruction, Jack O'Connell, to serve as the classified representative on the 54 member P-16 Council. This is a statewide Council of education, business, and community leaders charged with developing strategies to better coordinate, integrate, and improve education for preschool through college students.

Martha has served on CSEA's Board of Directors for over 4 years and is directly responsible for Area A which includes 18 counties and nearly 19,000 school employees. She represents an area that extends from Sacramento, to Siskiyou in the North, Trinity in the West and the Nevada state border to the East. Martha has also served as a Regional Representative, Chapter President and has served on CSEA's Research and Negotiations Committee.

On a daily basis, her love is to work with children with special needs. Martha and her husband Mike live in Rio Linda and love spending time with their grandchild Lillyann.

Assembly Bill No. 942

CHAPTER 684

An act to add Section 49414.5 to the Education Code, relating to pupil health.

[Approved by Governor October 8, 2003. Filed with
Secretary of State October 9, 2003.]

LEGISLATIVE COUNSEL'S DIGEST

AB 942, Leno. Emergency medical services: diabetes.

Existing law provides that each pupil who is required to take, during the regular schoolday, medication prescribed for him or her by a physician, may be assisted by the school nurse or other designated school personnel if the school district receives a written statement from the physician detailing the method, amount, and time schedules by which the medication is to be taken and a written statement from the parent or guardian of the pupil indicating the desire that the school district assist the pupil in the matters set forth in the physician's statement.

This bill would, in the absence of a credentialed school nurse or other licensed nurse, authorize each school district to provide voluntary emergency medical training to school personnel, as defined, to administer emergency medical assistance to pupils with diabetes suffering from severe hypoglycemia if certain performance standards for training and supervision are developed by the American Diabetes Association in cooperation with several other entities for approval and distribution by the State Department of Health Services' Diabetes Control Program. The bill would permit certain pupils with specified authorization to test their blood glucose level and provide diabetes self-care in any area of the school or school grounds, during any school-related activity, and, upon the request of the pupil's parent or guardian, in a private location.

The bill would declare the Legislature's intent that immunity from civil liability, as specified in existing law, shall apply to activities authorized by the bill's provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 49414.5 is added to the Education Code, to read:

49414.5. (a) In the absence of a credentialed school nurse or other licensed nurse onsite at the school, each school district may provide school personnel with voluntary emergency medical training to provide emergency medical assistance to pupils with diabetes suffering from severe hypoglycemia, and volunteer personnel shall provide this emergency care, in accordance with standards established pursuant to subdivision (b) and the performance instructions set forth by the licensed health care provider of the pupil. A school employee who does not volunteer or who has not been trained pursuant to subdivision (b) may not be required to provide emergency medical assistance pursuant to this subdivision.

(b) (1) The Legislature encourages the American Diabetes Association to develop performance standards for the training and supervision of school personnel in providing emergency medical assistance to pupils with diabetes suffering from severe hypoglycemia. The performance standards shall be developed in cooperation with the Department of Education, the California School Nurses Organization, the California Medical Association, and the American Academy of Pediatrics. Upon the development of the performance standards pursuant to this paragraph, the State Department of Health Services' Diabetes Prevention and Control Program shall approve the performance standards for distribution and make those standards available upon request.

(2) Training established pursuant to this subdivision shall include all of the following:

- (A) Recognition and treatment of hypoglycemia.
- (B) Administration of glucagon.
- (C) Basic emergency followup procedures, including, but not limited to, calling the emergency 911 phone number and contacting, if possible, the pupil's parent or guardian and licensed health care provider.

(3) Training by a physician, credentialed school nurse, registered nurse, or certificated public health nurse according to the standards established pursuant to this section shall be deemed adequate training for the purposes of this section.

(4) (A) A school employee shall notify the credentialed school nurse assigned to the school district if he or she administers glucagon pursuant to this section.

(B) If a credentialed school nurse is not assigned to the school district, the school employee shall notify the superintendent of the school district, or his or her designee if he or she administers glucagon pursuant to this section.

(5) All materials necessary to administer the glucagon shall be provided by the parent or guardian of the pupil.

(c) In the case of a pupil who is able to self-test and monitor his or her blood glucose level, upon written request of the parent or guardian, and with authorization of the licensed health care provider of the pupil, a pupil with diabetes shall be permitted to test his or her blood glucose level and to otherwise provide diabetes self-care in the classroom, in any area of the school or school grounds, during any school-related activity, and, upon specific request by a parent or guardian, in a private location.

(d) For the purposes of this section, the following terms have the following meanings:

(1) "School personnel" means any one or more employees of a school district who volunteer to be trained to administer emergency medical assistance to a pupil with diabetes.

(2) "Emergency medical assistance" means the administration of glucagon to a pupil who is suffering from severe hypoglycemia.

SEC. 2. It is the intent of the Legislature that Section 1799.102 of the Health and Safety Code shall apply to activities authorized by this act.

CONCURRENCE IN SENATE AMENDMENTS
AB 942 (Leno)
As Amended August 28, 2003
Majority vote

ASSEMBLY:	76-0	(May 27, 2003)	SENATE:	38-0	(September 3,	
					2003)	

Original Committee Reference: ED.

SUMMARY : Authorizes school staff to provide emergency medical assistance to diabetic pupils suffering from severe hypoglycemia.

The Senate amendments:

- 1) Exempt a school employee who does not volunteer to provide the services specified, or is not trained, as specified, from being required to provide emergency medical assistance.
- 2) Encourage the American Diabetes Association to develop performance standards for the training and supervision of school personnel in providing emergency medical assistance to pupils with diabetes suffering from severe hypoglycemia.
- 3) Require, upon the development of the performance standards, the Department of Health Services' (DHS) Diabetes Prevention and Control Program to approve the performance standards for distribution and to make them available upon request.
- 4) Require a school employee to notify the school nurse when he/she administers glucagon, however, in the event that a school nurse is not assigned to the school, the superintendent of the school district shall be notified.
- 5) Declare legislative intent that immunity from civil liability, as specified in existing law, applies to activities authorized by this bill.

EXISTING LAW provides that each pupil who is required to take, during the regular schoolday, medication prescribed for him or her by a physician, may be assisted by the school nurse or other designated school personnel if the school district receives a

written statement from the physician detailing the method, amount and time schedules by which the medication is to be taken and a written statement from the parent or guardian of the pupil indicating the desire that the school district assist the pupil in the matters set forth in the physician's statement.

AS PASSED BY THE ASSEMBLY , this bill authorized school staff to provide emergency medical assistance to diabetic pupils suffering from severe hypoglycemia and required that the American Diabetes Association, in cooperation with the State Department of Education (SDE), California School Nurses Organization, California Medical Association, and American Academy of Pediatrics, develop performance standards for the training and supervision of school personnel in providing emergency medical assistance to pupils with diabetes suffering from severe hypoglycemia.

FISCAL EFFECT : According to the Senate Appropriations Committee, no direct fiscal effect.

COMMENTS : According to the author, there is significant confusion over who can administer medication in schools, which leads to inconsistent school health policies. Many argue only licensed nurses can administer medication in schools and results in a situation where, when there is no school nurse on site, a child must go without necessary medication. Existing California law has led to a disconnect, where schools are required to meet pupil health needs but only certified persons are permitted to fulfill such obligations. School districts are not required to employ these certified persons, and many do not. Consequently, many California schools have no staff to attend to pupil's emergency health needs. This bill would address this problem for diabetic students who may require medication in emergency situations.

Previous legislation, AB 481 (Firebaugh) of 2002, which was vetoed, would have required properly trained teachers to administer insulin or glucagon and perform testing and monitoring of a pupil's blood glucose level in the absence of a school nurse. AB 481 also would have prohibited school personnel from being required to provide assistance to diabetic pupils unless the parent or guardian has signed a waiver of liability and authorized pupils to test their blood glucose level and provide diabetes self-care. AB 481 was vetoed by the Governor because it "would create a costly new state

reimbursable mandate estimated by the Department of Finance to be potentially tens of millions of dollars. In addition, I am advised by school district personnel that the immunity from liability language may protect neither the school district or school personnel from liability."

K.C. Settlement Agreement & Legal Advisory

This settlement agreement and legal advisory spell out the legal responsibilities of a school district when a student requires administration of insulin during the school day.

NOTE:

On December 26, 2008, the Sacramento County Superior Court held that the portions of the Legal Advisory stating that trained unlicensed school personnel may administer insulin in the absence of a licensed nurse violate state law. The trial court's ruling did not affect that part of the Legal Advisory stating that such personnel may administer insulin in emergencies.

The case is now on appeal, and the Court of Appeal has confirmed that the trial court's ruling is stayed until the appeal is finally resolved. The entire Legal Advisory therefore remains in effect. However, interested parties should check this Web site periodically for updates on the litigation and the status of the Legal Advisory.

EXHIBIT A

LEGAL ADVISORY ON RIGHTS OF STUDENTS WITH DIABETES IN CALIFORNIA'S K-12 PUBLIC SCHOOLS

Pursuant to the recent Settlement Agreement in *K.C. et al. v. Jack O'Connell, et al.*, Case No. C-05-4077 MMC, in the United States District Court for the Northern District of California, the California Department of Education (CDE) has agreed to remind all California school districts and charter schools of the following important legal rights involving students with diabetes who have been determined to be eligible for services under either the Individuals with Disabilities Education Act (IDEA) and related California law or Section 504 of the Rehabilitation Act of 1973 (Section 504) and related California law.

The CDE notes that this is a complex area of the law. Every effort has been made to be clear and concise in providing this advisory.

- I. The Applicability of Two Federal Anti-Discrimination Statutes (Section 504 and the ADA) to those Public School Students with Diabetes Who Require Diabetes Health Related Services While Attending K-12 Schools in California
- II. California's Anti-Discrimination Statutes and Students with Diabetes Who Require Diabetes Health Related Services During the Day In Order to Safely Attend K-12 Schools in California
- III. The IDEA and Students With Diabetes Who Require Diabetes Health Related Services During the Day In Order to Safely Attend K-12 Schools in California
- IV. Who May Administer Insulin in California to Students with Diabetes As a Related Service Under Section 504 and the IDEA
- V. Monitoring and Compliance by CDE
- VI. Impartial Due Process Hearings
- VII. Resources

- Checklist
- Footnotes

I. The Applicability of Two Federal Anti-Discrimination Statutes (Section 504 and the ADA) to those Public School Students with Diabetes Who Require Diabetes Health Related Services While Attending K-12 Schools in California

Two federal anti-discrimination statutes, Section 504 of the Rehabilitation Act of 1973 and Title II of the Americans with Disabilities Act of 1990 (ADA), together establish rights for eligible students with diabetes in California's public schools. Together, they serve to protect such students from discrimination based upon their disability including the right to receive a free appropriate public education (FAPE). The two statutory schemes are treated synonymously. (*Wong v. Regents of University of California*, 192 F.3d 807, 816 n. 26.) Hence, in this Legal Advisory, Section 504 will mean both Section 504 as well as the ADA unless otherwise noted.

A. Eligibility

In general, a student will be determined to have a disability under Section 504 if he/she has a mental or physical impairment that substantially limits one or more major life activities, such as eating, breathing, caring for oneself, performing manual tasks, hearing, speaking, walking, and learning. (See 34 CFR sec. 104.4, subds. (j), (k), and (i).) Accordingly, learning is not the only major life activity that must be considered when determining eligibility under Section 504. (*Rock Hill (OH) Local Schools*, 37 IDELR 222 (OCR 2002).)

The Ninth Circuit Court of Appeals recently determined that diabetes is a "physical impairment" and then addressed whether that impairment substantially limited a major life activity under the facts of that case. (*Fraser v. Goodale*, 342 F.3d 1032 (9th Cir. 2003).) In finding that the plaintiff had presented evidence that she was substantially limited in eating, the court noted that the plaintiff was required to be vigilant about testing blood glucose levels and adjusting food intake, insulin and physical activity accordingly. *Id.* at 1040-1041.

Fluctuations in blood glucose levels can impact concentration and comprehension, as well as have significant and potentially life-threatening short and long term health implications. See "Helping the Student with Diabetes Succeed - A Guide for School Personnel" (Outside Source), U.S. Department of Health and Human Services (2003).

To avoid these fluctuations in blood glucose levels, students with diabetes must be vigilant about balancing food consumption, exercise, and administration of medication. For these reasons, the Office for Civil Rights of the United States Department of Education (OCR) has found that students with diabetes to be "disabled" under Section 504. (See *Bement (IL) Community Unit School District #5*, 14 EHLR 353:383 (OCR 1989) (holding that a student with diabetes is disabled under Section 504 when she required close monitoring of her diet, behavior, and activities at all times in order for her to be able to attend school); *Irvine (CA) Unified Sch. Dist.*, 19 IDELR 883, 884 (OCR 1993) (determining that the student with type 1 diabetes was a "disabled person" as defined by the regulation implementing Section 504).

B. 504 Plans

Once a local education agency (LEA) determines that a student is entitled to Section 504 protections, this includes the provision of a free appropriate public education. (34 CFR sec. 104.35.) Services, and accommodations are determined through the 504 planning process, and documented in a 504 plan. *Henderson County (NC) Pub. Schs.*, 34 IDELR 43, 44 (OCR 2000) (voluntary resolution agreement reached to develop Section 504 plan providing for a broad range of diabetes-related aids and services, including training staff to monitor blood glucose, count carbohydrates, manage student's insulin pump, and establish procedures for the provision of appropriate emergency services); *Prince George's County (MD) Schools*, 39 IDELR 103, 104 (OCR 2003) (district required to develop a Section 504 Plan tailored to the individual needs of a student with type 1 diabetes).

Academic modifications may be necessary whether or not the major life activity of "learning" is affected. A student with diabetes may need to have his/her curriculum adapted in a variety of ways such as changes in physical education instruction, in the regular school day schedule (such as breaks required to test for and treat abnormal blood sugar levels), in additional breaks or other time modifications during tests, and in the regular schedule for eating, drinking and toileting. These accommodations should be documented in the 504 plan. Decisions about what health care services a student will receive, including treatment while at school, such as the timing and dosage of insulin to be administered, usually are based on the treating physician's written orders. (See *Cal. Ed. Code* sec. 49423.) In rare circumstances, the 504 team will question the doctor's treatment plan as being outside standards of care and will seek a second opinion at school district expense. (See section of this advisory discussing IDEA entitled *Related Services as Including Management/Administration of Insulin and Other Diabetes Care Tasks for Children With the Disability of OHI* below.)

C. Individualized Inquiries Required; Blanket Policies Prohibited

An LEA may not have a blanket policy or general practice that insulin or glucagon administration, or other diabetes-related health care services, will only be provided by district personnel at one school in the district or will always require removal from the classroom in order to receive diabetes related health care services. For example, in *Christopher S. v. Stanislaus County Office of Educ.*, 384 F.3d 1205, 1212 (9th Cir. 2004), the Ninth Circuit Court of Appeals noted that OCR has repeatedly held that blanket policies that preclude individual evaluation of a particular child's educational and health related services needs violate Section 504. (See also *Conejo Valley (CA) Unified Sch. Dist.*, 20 IDELR (LRP) 1276, 1280 (OCR 1993) (district violated Section 504 by failing to perform an evaluation that was individualized by proposing changes in placement based upon a generalized district policy regarding who could perform injections without regard to student's individual education needs); *Irvine (CA) Unified Sch. Dist.*, 23 IDELR 1144, 1146 (OCR 1995) (district's "unwritten policy" prohibiting blood glucose testing in classroom violated 34 CFR sec. 104.35(c)(3) requiring that a team of persons give careful consideration to all of the information available and makes determinations based upon the individual needs of the disabled student).) See further discussion below in the section of this advisory discussing IDEA entitled *Related Services May Include Management/Administration of Insulin and Other Diabetes Care Tasks for Children With the Disability of OHI*.

In addition, a school or district may not require the parent or guardian to waive any rights or agree to any particular placement or related services as a condition of administering medications or assisting a student in the administration of medication at school. (*Berlin Brothersvalley (PA.) School Dist.*, EHLR 353:124 (OCR 1988) (district policy of giving school officials discretion in whether to administer needed medication and conditioning the provision of services required by Section 504 or IDEA on parents signing a waiver of liability is prohibited). See further discussion below in the section of this advisory discussing IDEA entitled *School Placement Decisions*.

D. FAPE Under Section 504

Pursuant to 34 CFR section 104.33, school districts must provide a free appropriate public education (FAPE) to all students with disabilities in public elementary and secondary schools. Under Section 504, "appropriate education" means "the provision of regular or special education and related aids and services that (i) are designed to meet individual educational needs of handicapped persons as adequately as the needs of nonhandicapped persons are met and (ii) are based upon adherence to procedures that satisfy the requirements of 34 CFR sections 104.34, 104.35, and 104.36." (34 CFR section 104.33 (b)(emphasis added).)

The OCR has applied the FAPE obligation broadly to ensure nondiscrimination by providing individual accommodations that provide each disabled student with a FAPE. The requirement to provide FAPE under Section 504 has been applied in the context of the administration of medication in general and diabetes-based related services in particular. (See *Conejo Valley (CA) Unified Sch. Dist.*,

supra; Irvine (CA) Unified Sch. Dist., *supra*; and Prince George's County (MD) Schools, *supra*.) See also, Chapter 4 of Compliance With The Americans With Disabilities Act: A Self-Evaluation Guide for Public Elementary and Secondary Schools, (Outside Source) (last visited March 30, 2007) Office for Civil Rights Department of Education, United States of America (1995). Unlike the requirement to provide auxiliary aids in contexts other than FAPE ... the obligation to provide related aids and services necessary to the provision of FAPE is not subject to the limitations regarding undue financial and administrative burdens or fundamental alteration of the program." *Id.* at 73.

[return to top](#)

II. California's Anti-Discrimination Statutes and Students with Diabetes Who Require Diabetes Health Related Services During the Day In Order to Safely Attend K-12 Schools in California

California's anti-discrimination statutes prohibit discrimination on the basis of disability under any program or activity funded directly by the State. (Cal. Gov. Code sec. 11135(a).) "Disability" means any mental or physical disability as defined by *Government Code* section 12926. (Cal. Gov. Code sec. 11135(d)(1).) "Physical disability" is defined in *Government Code* section 12926(k)(1) and (2). It affords broader coverage than Section 504 because it requires a "limitation" rather than a "substantial limitation" of a major life activity. (Cal. Gov. Code secs. 12926(k)(1)(B); 12926.1(c), (d)(2); see generally *Colmenares v. Braemar Country Club, Inc.* (2003) 29 Cal.4th 1019, 1022-1032.)

In addition, whether a physical disability limits a major life activity under California's statutory scheme must "be determined without regard to mitigating measures such as medications...." (Cal. Gov. Code sec. 12926(k)(1)(B)(i).) This provision has made the Supreme Court's holding in *Sutton v. United Airlines*, 527 U.S. 471 (1999), which required consideration of such mitigating measures inapplicable under California law. Furthermore, section 12926(k)(2) of the *Government Code* provides that all students with diabetes who require special education or related services (i.e., health-related services) are protected by state anti-discrimination laws.

Government Code section 11135 incorporates the rights under the ADA and thus Section 504. (See *Gov. Code* sec. 11135(b) and 42 USC sec. 12133; 28 CFR sec. 35.103(a)). Therefore, the discussion above regarding Section 504 and students with diabetes is applicable under the broad definitions of physical disability in California.

[return to top](#)

III. The IDEA and Students With Diabetes Who Require Diabetes Health Related Services During the Day In Order to Safely Attend K-12 Schools in California

The primary purpose of the IDEA is "to ensure that all children with disabilities have available to them a free appropriate public education (FAPE) that emphasizes special education and related services designed to meet their unique needs and prepare them for further education, employment, and independent living." (20 USC secs. 1400(d)(1)(A), 1401 (a).) California law sets the same standard for educating individuals with exceptional needs as the reauthorized IDEA. (Cal. Ed. Code secs. 56000, 56363(a).)

A. Eligibility

The IDEA requires LEAs to conduct "child find" activities to ensure that children with diabetes are identified, located, and evaluated. (20 USC sec. 1412(a)(3).) Under the IDEA, a child with diabetes is evaluated for eligibility under one of the 13 categories of disability, including the disability of "other health impaired" (OHI). (20 USC sec. 1401(3)(A); 34 CFR sec. 300.8; Cal. Ed. Code sec. 56026; Cal. Code Regs., Tit. 5, sec. 3030.) The reauthorized IDEA defines "child with a disability" in the following way:

The term "child with a disability" means a child -

- (i) with ... other health impairments and
- (ii) who, by reason thereof, needs special education and related services. (20 USC sec. 1401(3)(A).)

The term "other health impairments" (OHI) is further defined in the recently promulgated regulations as follows:

(c) Definitions of disability terms. The terms used in this definition of a child with a disability are defined as follows:

(9) Other health impairment means having limited strength, vitality, or alertness, including a heightened alertness to environmental stimuli, that results in limited alertness with respect to the education environment, that -

- (i) is due to chronic or acute health problems such as diabetes and
- (ii) adversely affects a child's educational performance.

Hence, an individualized education program (IEP) team can determine that a child with diabetes is eligible under the disability of OHI because high or low blood glucose levels can cause symptoms giving him/her limited strength, limited alertness, and creating chronic or acute health problems that adversely affect the student's educational performance. (See "Helping the Student with Diabetes Succeed - A Guide for School Personnel" [Outside Source], U.S. Department of Health and Human Services, 2003). Fluctuations in blood glucose levels may have an adverse effect on education in a variety of ways, including the effect on concentration, comprehension, and energy levels. It should be noted that the IEP team "must make an individual determination as to

whether, notwithstanding the child's progress in a course or grade, he or she needs or continues to need special education and related services." (34 CFR sec. 300.101(c).)

B. Special Education Defined

The IDEA defines "special education" as meaning "specially designed instruction, at no cost to parents, to meet the unique needs of a child with a disability, including -

- (A) instruction conducted in the classroom, in the home, in hospitals and institutions, and in other settings; and
- (B) instruction in physical education." (20 USC section 1401 (29).)

"Specially designed instruction" means "adapting, as appropriate to the needs of the eligible child under this part, the content, methodology, or delivery of instruction (i) to address the unique needs of the child that result from the child's disability and (ii) to ensure access of the child to the general curriculum, so that the child can meet the educational standards within the jurisdiction of the public agency that apply to all children." (34 CFR sec. 300.39(b)(3).)

For example, an IEP team could determine that a child who meets the criteria for eligibility under the category of OHI based upon chronic or acute health problems arising from diabetes would need to have his/her curriculum adapted in ways such as changes in the physical education instruction, in the regular school day schedule (such as various breaks required by abnormal blood sugar levels involving medical treatment), in allowed time for taking tests, in the regular schedule for eating, drinking and toileting, in assignment due dates, and in various other academic adaptations.

C. Individualized Education Program

Determinations about eligibility, special education and related services under the IDEA and relevant state statutes are made generally by the child's Individualized Education Program (IEP) team. (See generally Cal. Ed. Code secs. 56340-56347.) Such determinations are always based upon the unique needs of the individual child.

The term "individualized education program" (IEP) means a written statement for each child with a disability that is developed, reviewed, and revised in accordance with 20 USC section 141 4(d). As a part of each IEP, there must be "a statement of the special education and related services and supplementary aids and services, based on peer-reviewed research to the extent practicable, to be provided to the child, or on behalf of the child, and a statement of the program modifications or supports for school personnel that will be provided for the child...." (20 USC sec. 1414(d)(1)(A)(i)(IV)) in school and in extracurricular and other nonacademic activities. The 2006 implementing regulations are located at 34 CFR sections 300.320 through 300.328.

D. Related Services May Include Management/Administration of Insulin and Other Diabetes Care Tasks for Children With the Disability of OHI

In general, the reauthorized IDEA includes "school nurse services" as a "related service." (20 USC sec. 1401 (26).) The statutory definition was expanded in the regulations to include school health services. (34 CFR sec. 300.34.) California's definition of designated instruction and services/related services is located in *Education Code* section 56363 and is synonymous with related services in the reauthorized IDEA in 20 USC section 1401 (26). California's designated instruction services thus do not deviate from the federal related services.

If a child needs both special education and health services, then, as determined by the child's IEP team, school nurse/health services should be made available to a child with the eligible disability of OHI as documented in the student's IEP. Services related to an OHI-eligible child's diabetes health care needs at school, including those involving the management and administration of insulin, are covered under the IDEA as nursing and health services rather than excluded from coverage as medical services requiring a physician to provide them. (See *Clovis Unified School Dist. v. Office of Administrative Hearings*, 903 F.3d 635, 641-643 (9th cir. 1990) discussing and applying *Irving Independent School District v. Tatro*, 468 U.S. 883 (1984).)

In California, by statute both a written statement from the child's physician as well as a written statement from the child's parent are required before either a school nurse or other designated school personnel may assist the child with the administration of medication. (Cal. Ed. Code sec. 49423.) Hence, decisions about what health care services a student will receive, including treatment while at school, such as the timing and dosage of insulin to be administered usually are based on the treating physician's written orders. (See Cal. Ed. Code sec. 49423.) In rare circumstances the IEP team will question the doctor's treatment plan as being outside the standard of care and then request clarification from the treating physician or a second opinion with the consent of the parent, at the district's expense. (See 34 CFR sec. 300.300; *Shelby S. ex rel. Kathleen T. v. Conroe Independent School Dist.*, 454 F.3d 450, 454-455 (5th Cir. 2006) (school district authorized to compel medical examination over parent objection and necessity demonstrated).) In addition, the IEP team is responsible for determining educational modifications. (See, *Special Education Defined*, above).

E. Individualized Inquiries Required; Blanket Policies Prohibited

As with Section 504 determinations discussed above in Part I.C., decisions by IEP teams must be based upon individualized inquiries. The IDEA and its implementing regulations are premised upon the fact that each child is "unique" (20 USC sec. 1400(d)(1)(A)) and must receive an "individualized education program" (20 USC sec. 1401(14); see generally *Porter v. Board of Trustees of Manhattan Beach Unified School Dist.*, 307 F.3d 1064, 1066 (9th Cir. 2002) quoting *Bd. of Educ. v. Rowley*, 458 U.S. 176, 188-189 (1982) ("right to public education for students with disabilities 'consists of educational instruction specially designed to meet the unique needs of the handicapped child, supported by such services as are necessary to permit the child 'to benefit' from the instruction").) As a consequence, decisions about a specific child's eligibility for services under the IDEA must not be based upon the generalized or "blanket" policies of a local education agency rather than the unique needs of the individual child. (See Part I.C.,

supra.) Therefore, policies that restrict the availability of health related services across-the-board would be out of compliance with the mandate to individualize decisions about special education and related services needs.

F. School Placement Decisions

School placement decisions may not be based upon the unwillingness of a district to provide needed related services to a child with OHI-diabetes disability at the school that the child would otherwise attend. A district may not require the parent to waive any rights, hold the district harmless, or agree to any particular placement or related services as a condition of administering medication or assisting a student in the administration of medication at school. (See Comment to IDEA regulations at p. 46587 (federal register) involving 34 CFR sec. 300.116(c): "Unless the IEP of a child with a disability requires some other arrangement, the child is educated in the school that he or she would attend if nondisabled Public agencies must not make placement decisions based on a public agency's needs or available resources, including budgetary considerations and the ability of the public agency to hire and recruit qualified staff," see also *Berlin Brothers Valley (PA.) School Dist.*, EHLR 353:124 (OCR 1988) (blanket waiver of liability as condition to provision of medical services prohibited). For example, a district may not have a blanket policy or general practice that insulin or glucagon administration or other diabetes-related health care service are only going to be provided by district personnel at one school in the district, or that a child will always need to be removed from the classroom in order to receive diabetes related health care services. An IEP developed in the legally-required manner, which takes into account all of the relevant medical and education factors under the IDEA for each disabled child, is the only way to ensure that such a student receives an individualized determination of what constitutes FAPE under the IDEA and relevant state statutes.

G. Administrative Procedures; Financial Burden Not a Defense

A parent of a child with the disability of OHI or an organization can file an administrative complaint with the CDE alleging that a school district is violating the IDEA or relevant state statutes by failing to identify, evaluate, or provide a FAPE to a student with diabetes or a group of students with diabetes, including challenging a district policy or practice that restricts the provision of related health services to students eligible for such services under the IDEA. (34 CFR secs. 300.151-300.153; Calif. Code Regs., Tit. 5, secs. 4600-4671.)

In the alternative, a parent who disagrees with the IEP decision regarding identification, evaluation, or the provision of FAPE and related services can file for an impartial due process hearing with the Office of Administrative Hearings. (20 USC sec. 1415 (e)-(i).) An OAH judge can order that the applicable required related school health services be provided by the district, including the administration of insulin during the school day. (20 USC sec. 1415(f)(3)(E).) Financial burden is not a valid defense available to the LEA under the *Garret F.* case. (*Cedar Rapids v. Garret F.*, 526 U.S. 66, 75, fn. 6, 78-79 (1999) (district required to fund related school health services under 34 CFR sec. 300.13(a) where necessary in order to provide student with meaningful access to public school).)

[return to top](#)

IV. Who May Administer Insulin in California to Students with Diabetes As a Related Service Under Section 504 and the IDEA

A. California Law

It is the position of the CDE that the *Business and Professions Code* section 2725(b)(2) and the California *Code of Regulations*, Title 5, section 604 authorize the following types of persons to administer insulin in California's public schools pursuant to a Section 504 Plan or an IEP:

1. self administration, with authorization of the student's licensed health care provide and parent/guardian;¹
2. school nurse or school physician employed by the LEA;
3. appropriately licensed school employee (i.e., a registered nurse or a licensed vocational nurse) who is supervised by a school physician, school nurse, or other appropriate individual;
4. contracted registered nurse or licensed vocational nurse from a private agency or registry, or by contract with a public health nurse employed by the local county health department;
5. parent/guardian who so elects;
6. parent/guardian designee, if parent/guardian so elects, who shall be a volunteer who is not an employee of the LEA; and
7. unlicensed voluntary school employee with appropriate training, but only in emergencies as defined by Section 2727(d) of the *Business and Professions Code* (epidemics or public disasters).²

B. Federal Law

As noted above in Parts I and III, federal law under Section 504 and the IDEA provides that the administration of insulin can be determined to be a related service that must be provided to a student pursuant to a Section 504 Plan or an IEP in order to ensure FAPE. CDE has recognized in the regulations which implement *Education Code* section 49423 regarding the administration of medication to students during the school day that they did not affect "in any way" either the content or implementation of a student's Section 504 Plan or IEP. (Calif. Code Regs., Tit. 5, section 610(d).) Further, CDE's *Program Advisory* (PDF; 188KB; 30pp.) (required by Section 611 of the regulations) recognized that students' rights under Section 504 and the IDEA are distinct from state legal requirements.

C. Reconciliation of State and Federal Law

The difficult issue in this area is reconciling state and federal requirements. Clearly the first set of personnel who are authorized to administer insulin pursuant to a Section 504 Plan or an IEP are those persons who are expressly so authorized under California law, as set forth in Part IV.A, supra. The question is what should occur when no expressly authorized school personnel are available.

In CDE's view, the list cannot be taken as exhaustive because LEAs must also meet federal requirements - even if the personnel expressly authorized by California are not available. In practical terms, this means that the methodology followed by some LEAs of training unlicensed school employees to administer insulin during the school day to a student whose Section 504 Plan or IEP so requires it is a valid practice pursuant to federal law. If the LEA determines that insulin administration by the types of persons listed in categories 2-4 are not available or feasible, then unlicensed school employees with appropriate training would be authorized under federal law to administer insulin in accordance with the student's Section 504 Plan or IEP. What is not valid is for an LEA to adopt a general policy or practice that a Section 504 Plan or IEP need not be developed or followed because the LEA is not able to comply with the student's federal rights based upon the express provisions of state law.

When federal and state laws are reconciled, it is clear that it is unlawful for an LEA to have a general practice or policy that asserts that it need not comply with the IDEA or Section 504 rights of a student to have insulin administered at school simply because a licensed professional is unavailable. In such situations, federal rights take precedence over strict adherence to state law so that the educational and health needs of the student protected by the Section 504 Plan or IEP are met.

[return to top](#)

V. Monitoring and Compliance by CDE

A. IDEA

Under the IDEA, the CDE monitors compliance with federal and state special education statutes and regulations with its Quality Assurance Process (QAP). That process is characterized by the gathering and evaluating of data in order to identify districts and areas within districts to aid in the inquiry, evaluation, and review of compliance issues. This enables the LEA and the CDE to develop corrective action plans, program improvement goals, and provide technical assistance to improve services to special education students throughout California.

Pursuant to the K.C. Settlement Agreement, the CDE has agreed to modify its QAP monitoring instruments and process to include special evaluation items related to students with the disability of OHI with chronic or acute health problems arising from diabetes.

The CDE also assures compliance under the IDEA by maintaining an administrative complaints system as required by federal regulation. (See 34 CFR sections 300.151-300.153.) Under 34 CFR section 300.153(a), a complainant can be either an organization or an individual who files a signed written complaint alleging any violation concerning identification, evaluation, placement, or the provision of a FAPE in the least restrictive environment including the provision related services. For example, a complaint may allege policies and/or practices that violated the child's right to receive an individualized assessment or eligibility and/or the provision of diabetes related health care services pursuant to the IEP process and/or any dispute arising out of the IEP process.

The required elements of a complaint are set forth in 34 CFR section 300.153(b). Of particular note is the requirement that a complaint alleging child-specific issues must contain the name and address of the residence of the child (34 CFR sec. 300.153(b)(4)(a).) Complaints of a systemic nature under the IDEA do not need to identify the individual student by name, although they still must provide facts of the alleged violation that are sufficient for the CDE or the district to conduct an effective investigation, and they must be signed.

B. Section 504/State Statutes

As required by the Uniform Complaints Procedure, CDE's Office of Equal Opportunity will continue to accept and investigate complaints pursuant to Section 504 and *Government Code* section 111 35 which are filed by an organization or a student with a disability that alleges individual or systemic discrimination arising from an alleged non-compliant policy or practice or the failure to provide diabetes-related health services, reasonable accommodations or modifications to the student's educational program. (See Chapter 5.1, the Uniform Complaint Procedures (Sections 4600-4670) and Chapter 5.3, involving Nondiscrimination and Educational Equity, Sections 4900-4965.)

[return to top](#)

VI. Impartial Due Process Hearings

Parents who disagree with a school district's decisions regarding their child's eligibility and/or placement under the IDEA also have a federal right to request a due process mediation and/or hearing. (20 USC sec. 1415.) Procedural rights to an impartial hearing provided by the local district if a parent disagrees with a Section 504 team decision are also required by federal law. (34 CFR sec. 04.36.)

VII. Resources

CDE recommends that local education agencies and SELPAs use the following documents as guidelines for compliance: [Program Advisory on Medication Administration](#) (PDF; 188KB; 30pp.) (California State Board of Education, 2005); [Sample Section 504 Plan](#)

and Diabetes Medical Management Plan (Outside Source), and "Helping the Student with Diabetes Succeed - A Guide for School Personnel" (Outside Source) (U.S. Department of Health and Human Services, 2003).

Checklist: Who May Administer Insulin in California's Schools Pursuant to An IEP or a Section 504 Plan

Business and Professions Code section 2725(b)(2) and the California *Code of Regulations*, Title 5, section 604 authorize the following types of persons to administer insulin in California's public schools pursuant to a Section 504 Plan or an IEP:

1. self administration, with authorization of the student's licensed health care provider and parent/guardian;
2. school nurse or school physician employed by the LEA;
3. appropriately licensed school employee (i.e., a registered nurse or a licensed vocational nurse) who is supervised by a school physician, school nurse, or other appropriate individual;
4. contracted registered nurse or licensed vocational nurse from a private agency or registry, or by contract with a public health nurse employed by the local county health department;
5. parent/guardian who so elect;
6. parent/guardian designee, if parent/guardian so elects, who shall be a volunteer who is not an employee of the LEA; and
7. unlicensed voluntary school employee with appropriate training, but only in emergencies as defined by Section 2727(d) of the *Business and Professions Code* (epidemics or public disasters).³

When no expressly authorized person is available under categories 2-4, supra, federal law - the Section 504 Plan or the IEP - must still be honored and implemented. Thus, a category #8 is available under federal law:

8. voluntary school employee who is unlicensed but who has been adequately trained to administer insulin pursuant to the student's treating physician's orders as required by the Section 504 Plan or the IEP.

¹ Unlicensed school personnel are authorized under state law to assist students as needed with insulin self-administration. Cal. *Ed. Code* sec. 49423 provides that unlicensed school personnel may assist with medication administration.

² In such emergency cases, an unlicensed voluntary school employee should have been trained to at least the standards specified by the American Diabetes Association's training slides entitled "Diabetes Care Tasks At School: What Key Personnel Need to know: Insulin Administration" (Attachment A). Such a voluntary school employee should be regularly, and at least quarterly, supervised by a school nurse, physician, or other appropriate individual under contract with the LEA, providing the training, and with emergency communication access to the same school nurse or physician. Documentation of training, ongoing supervision, and annual written verification of competency are strongly recommended, and such documentation should be annually submitted to the LEA employing the unlicensed person by the school nurse or physician.

³ In such emergency cases, an unlicensed voluntary school employee should have been trained to at least the standards specified by the American Diabetes Association's training slides entitled "Diabetes Care Tasks At School: What Key Personnel Need to know: Insulin Administration" (Outside Source). Such a voluntary school employee should be regularly, and at least quarterly, supervised by a school nurse, physician, or other appropriate individual under contract with the LEA, providing the training, and with emergency communication access to the same school nurse or physician. Diabetes is not a separate category in the IEP system as it does not have its own eligibility criteria. It falls under Other Health Impairment. Some students with diabetes can be eligible under other eligibility criteria and have diabetes at the same time. In such cases, the IEP system could track them under another eligibility category, so we would not have any documents that provide a count of students with diabetes.

Board Policy

Administering Medication And Monitoring Health Conditions

BP 5141.21

Students

Note: The following optional policy and administrative regulation apply to the administration of medication to students when the district receives written statements from both the student's physician and parent/guardian, pursuant to Education Code 49423 and 49423.1, as added by AB 2132 (Ch. 832, Statutes of 2004), and 5 CCR 600. Administration of medication for special education and Section 504 students is usually a component of the student's individual education program or accommodation plan; see BP/AR 5141.24 - Specialized Health Care Services and BP/AR 6159 - Individualized Education Program.

Note: 5 CCR 600-611 establish permissive guidelines for school personnel to follow in the administration of prescribed medication to students who may need assistance or who may self-administer the medication.

The Governing Board recognizes that some students may need to take medication prescribed by a physician during the school day in order to be able to attend school. The Superintendent or designee shall develop processes for the administration of medication to such students by school personnel.

(cf. 5141.24 - Specialized Health Care Services)
(cf. 6159 - Individualized Education Program)

Prescribed medication may be administered by the school nurse or other designated school personnel only when the Superintendent or designee has received written statements from both a student's physician and parent/guardian. (Education Code 49423; 5 CCR 600)

(cf. 3530 - Risk Management/Insurance)

Note: Education Code 49414.5 authorizes districts without a credentialed school nurse at a school to provide voluntary emergency medical training so that school personnel may provide assistance to students with diabetes suffering from severe hypoglycemia. Education Code 49414.5 encourages the American Diabetes Association and various state agencies to develop training standards, and lists standards to be included in the training, including recognition and treatment of hypoglycemia, administration of glucagons, and basic emergency follow-up procedures.

***Note: Education Code 49414 authorizes districts to voluntarily determine whether to make emergency epinephrine auto-injectors and trained personnel available at schools to persons suffering from severe allergic reactions. Districts that choose to train personnel in the use of

those injectors should refer to the California Department of Education's model standards of training which are available on the CDE's website.***

Note: The following paragraph should be modified to reflect district practice.

School staff who administer medication, including epinephrine auto-injections, to students shall receive training from qualified medical personnel on how such medication should be administered as well as training in the proper documentation and storage of the medication.

Staff authorized to administer the medication shall do so in accordance with administrative regulations and shall be afforded appropriate liability protection.

Note: 5 CCR 604 authorizes a parent/guardian to designate an individual to administer the medication, as specified below. See the accompanying administrative regulation.

If the parent/guardian so chooses, he/she may administer the medication to his/her child. In addition, the parent/guardian may designate another individual who is not a school employee to administer the medication to the student.

Self-Administration and Monitoring

Note: Education Code 49423, as amended by SB 1912 (Ch. 846, Statutes of 2004), and Education Code 49423.1, as added by AB 2132 (Ch. 832, Statutes of 2004), authorize students to carry and self-administer two types of prescription medication: auto-injectable epinephrine, for use by students suffering an anaphylactic reaction, and asthma medication. In order for students to self-administer such medication, the district must receive appropriate written statements, as specified in the accompanying administrative regulation.

Note: Districts may choose to allow students to carry and self-administer other types of medication beyond those authorized by the Education Code and may also allow students to self-test for conditions such as diabetes.

Upon written request by the parent/guardian and with the approval of the student's physician, a student with a medical condition that requires frequent treatment, monitoring, or testing may be allowed to self-administer, self-monitor, and/or self-test. The student shall observe universal precautions in the handling of blood and other bodily fluids.

(cf. 4119.43/4219.43/4319.43 - Universal Precautions)

(cf. 5141 - Health Care and Emergencies)

(cf. 5141.22 - Infectious Diseases)

Pittsburg Unified School District
Office of Student Services

Diabetic Student Support

- **Students with Diabetes**

When Student Services or the School is notified that a student has diabetes, we request a medical plan from the primary doctor with necessary accommodations including how and when insulin/medication should be monitored, the method of administration of insulin (pump, syringe or pills) or medication, when insulin/medication should be administered, when blood should be tested, normal glucose range, when to eat, what to do when student has minor or major, Hyper or Hypo glucose.

- **504 Plans**

504 plans may be developed if necessary. Make sure existing 504 plan is updated and implemented yearly or as needed. Some students may not require a 504 plan if needs are already met through the medical plan. 504 plans include areas of need, accommodations and modifications for equal access: Adjustments or support that the student needs in order to access programs on an equal basis and persons responsible for implementation (caregiver/parent, medical provider, teacher, student, principal, and other school staff).

- **Medical Provider/ Contracted Nurse**

Medical provider is asked to provide training for site staff responsible for monitoring and administering insulin and medical plan. The medical provider gives the trainings majority of the time. If no one is available from the medical provider, we will hire a Registered Nurse to train staff as needed on how to implement medical plan for student and on the generalities of diabetes. If student diabetes numbers are not within normal range, the caregiver/parent is notified and may be requested to bring in or have faxed or mailed from the doctor new medical information which may include modifications to the plan in one or more areas: eating, physical activities, amount of insulin, when to test blood, etc... The caregiver/parent may also sign a medical release form that allows the school to speak directly to the doctor. If this form is not signed the school will talk to the caregiver/parent and request that they acquire information from doctor immediately.

- **Students who count carbohydrates**

If student counts carbohydrates, we make sure that Child Nutrition Department gives the parent/student a carbohydrate count of the menu one week in advance. Insulin and carbohydrate equation is implemented in accordance with medical plan.

- **Assurances**

We make sure student has Glucagon kit and staff is trained to use. Snacks and foods which the student may need for low glucose levels are kept on hand in addition to medication needed for high glucose levels. Once staff is trained, they will monitor student's insulin/medication intake, physical activity, glucose levels and carbohydrate intake. If the doctor and the parent think that the student is responsible enough they may be allowed to keep all medical supplies on their person and have an extra set at the office. Students will be monitored and medication administered with assistance given in accordance with medical plan. Students who are given permission by their doctor may administer their own insulin/medication and monitor their own glucose levels.

- **Equal Access to Curriculum and School Activities**

All needed accommodations are made for diabetic students so that they can access core curriculum. Our goal is to make sure all students have equal access to core curriculum and can participate in all school activities. Staff are informed which students are diabetic for support reasons. Diabetic student's supplies are available to the student at all times.

Administering Medication And Monitoring Health Conditions

The Governing Board recognizes that some students may need to take medication prescribed by a health care provider during the school day in order to be able to attend school. The Superintendent or designee shall develop processes for the administration of medication to such students by school personnel.

(cf. 5141.24 - Specialized Health Care Services)

(cf. 6159 - Individualized Education Plan)

When the Superintendent or designee has received written statements from a student's authorized health care provider and parent/guardian, prescribed medication may be administered by designated school personnel. (Education Code 49423; 5 CCR 600)

(cf. 3530 - Risk Management/Insurance)

School staff who administer medication to students, including those who choose to administer anaphylactic injections, shall receive training from qualified medical personnel on how such medication should be administered as well as training in the proper documentation and storage of the medication.

Staff authorized to administer the medication shall do so in accordance with administrative regulations and shall be afforded appropriate liability protection.

If the parent/guardian so chooses, he/she may administer the medication to his/her child. In addition, the parent/guardian may designate another individual who is not a school employee to administer the medication to the student.

Upon written request by the parent/guardian and with the approval of the student's health care provider, a student with a medical condition that requires frequent monitoring, testing or treatment may be allowed to self-administer, self-monitor, or self-test. The student shall observe universal precautions in the handling of blood and bodily fluids.

Policy PACIFICA SCHOOL DISTRICT

Adopted: October 26, 2005 Pacifica, California

Administering Medication And Monitoring Health Conditions

Definitions

Authorized health care provider means an individual who is licensed by the State of California to provide medication. (5 CCR 601)

Other designated school personnel may include any individual employed by the district who has consented to administer the medication or otherwise assist the student, and who may legally administer the medication. (5 CCR 601)

Medication may include not only a substance dispensed in the United States by prescription, but also a substance that does not require a prescription, such as over-the-counter remedies, nutritional supplements, and herbal remedies. (5 CCR 601)

Parent/Guardian Responsibilities

Before a designated employee administers or assists in the administration of any prescribed medication to any student during school hours, the district shall have a written statement from the student's authorized health care provider and a written statement from the student's parent/guardian initiating such a request. (Education Code 49423; 5 CCR 600)

The authorized health care provider's written statement shall clearly:

1. Identify the student
2. Identify the medication
3. Specify the dosage
4. Specify the period of time during which the medication is to be taken
5. Contain the name, address, telephone number and signature of the authorized health care provider

The parent/guardian shall annually provide the Superintendent or designee a new written statement from the designated health care provider. In addition, the parent/guardian shall provide a new statement whenever there is a change in the student's health care provider or change in medication or dosage, method, date or time which the medication is required to be taken, or any other change in the student's circumstances.

The parent/guardian's written statement shall:

1. Identify the student
2. Grant permission for the authorized district representative to communicate directly with the student's authorized health care provider, as may be necessary, regarding the health care provider's written statement or any other question about the medication
3. Contain an acknowledgment that the parent/guardian understands his/her responsibilities to enable district employees to administer or otherwise assist the student in the administration of medication including, but not limited to, the parent/guardian's responsibility to provide a written statement from the authorized health care provider and to ensure that the medication is delivered to the school in a proper container by an individual legally authorized to be in possession of the medication

Parents/guardians shall provide medications in a properly labeled, original container along with the physician's instructions. For prescribed medication, the container shall bear the name and telephone number of the pharmacy, the student's identification, name and phone number of the physician, and physician's instructions. Medications that are not in their original container shall not be accepted or administered. Medications shall be delivered to the school by the parent/guardian, unless the Superintendent or designee authorizes another method of delivery.

The parent/guardian of a student on a continuing medication regimen for a nonepisodic condition shall inform the designated certificated employee of the medication being taken, the current dosage and the name of the supervising physician.

Parents/guardians may request in writing that their child be allowed to self-administer, monitor or treat his/her existing medical condition. The parent/guardian shall also provide a written statement from the student's authorized health care provider, as specified above. The statement shall acknowledge that the student is capable of self-administering the medication and that the student's health care provider has trained the student in self-administration. If the self medication includes an inhaler, the inhaler will be clearly marked with the student's full name.

A parent/guardian may designate an individual who is not an employee of the district to administer medication to his/her child as long as the individual is clearly identified, willing to accept the designation, permitted to be on the school site, and any limitations on the individual's authority are clearly established. The parent/guardian shall provide a written statement designating the individual and containing the information required above.

Designated Employee/District Responsibilities

The designated employee shall:

1. Administer or assist in administering the medication in accordance with the authorized health care provider's written statement
2. Accept delivery of medication from the student's parent/guardian, including counting and recording the medication upon receipt
3. Maintain a list of students needing medication during the school day, including the type of medication, times and dosage, as well as a list of students who are authorized to self-administer medication
4. Maintain a medication log documenting the administration of medication including the student's name; name of medication the student is required to take; dose of medication; method by which the student is required to take the medication; time the medication is to be taken during the regular school day; date(s) on which the student is required to take the medication; authorized health care provider's name and contact information; and a space for daily recording of medication administration

The daily record shall contain the date, time, amount of medication administered and signature of the individual administering the medication.

5. Maintain a medication record including the authorized health care provider's written statement, the parent/guardian's written statement, the medication log, and any other written documentation related to the administration of medication to the student
6. Ensure that student confidentiality is appropriately maintained

(cf. 5125 - Student Records)

7. Coordinate the administration of medication during field trips and after-school activities

8. Report any refusal of a student to take his/her medication to the parent/guardian
9. Keep all medication in a locked drawer or cabinet
10. As appropriate, communicate with the authorized health care provider regarding the medication and its effects
11. Ensure that unused, discontinued and outdated medication is returned to the student's parent/guardian where possible or, if the medication cannot be returned, is disposed of in accordance with state laws and local ordinances by the end of the school year

At the beginning of each school year, the Superintendent or designee shall notify parent/guardians that students who need to take prescribed medication during the school day may be assisted by designated school personnel as long as the district receives a written statement from the student's physician and parent/guardian in accordance with law, Board policy and administrative regulation: (Education Code 48980, 49423)

(cf. 5145.6 - Parental Notifications)

The Superintendent or designee shall inform all parents/guardians of the following requirements: (Education Code 49480)

1. The parent/guardian of a student on a continuing medication regimen for a nonepisodic condition shall inform the designated employee of the medication being taken, the current dosage and the name of the supervising physician.
2. With the parent/guardian's consent, the designated employee may communicate with the student's physician regarding the medication and its effects and may counsel school personnel regarding the possible effects of the drug on the student's physical, intellectual and social behavior, as well as possible behavioral signs and symptoms of adverse side effects, omission or overdose.

Regulation PACIFICA SCHOOL DISTRICT

Approved: October 26, 2005 Pacifica, California

Administering Medication And Monitoring Health Conditions

PHYSICIAN'S RECOMMENDATIONS FOR MEDICATION

This form is to be filled in and signed by a licensed physician. The form should then be signed by the parents/guardians and returned to the school.

Student's Last Name First Middle Age Birth Date Month Day Year

Name of School Name of Principal Name of Teacher Type of Class Grade

The law allows any person to assist in carrying out a physician's recommendation. The school recognizes the desirability of following physician's recommendations as nearly as possible at school, just as does a parent at home or any other person (not necessarily a nurse) if the physician requests his/her assistance. The fact that this is a service or accommodation which the school is not legally required to perform is recognized by all parties signing this form, and in so signing they agree to hold the district, its officers, employees or agents, harmless from all liability, suits, claims of whatever nature or kind which might arise out of these arrangements.

Do you wish this child to receive medication at school? (YES (NO

If yes, please fill in the following blanks:

Form Observed or Assisted

(tablet, pill, Number to Approximate by Whom

Name of Medication capsule, etc.) be Taken Time of Day (self, teacher, nurse,
etc.)

#1.

#2.

Precautions, if any

How is medicine to be brought to school:

By whom (student, parent, etc.)?

How often (daily, weekly, etc.)?

In what kind of container (envelope, bottle, plastic container)?

Does the physician wish to be able to talk briefly by telephone with someone (teacher, nurse, principal, psychologist) at intervals (weekly, monthly, quarterly) to see how this child is faring? If so, indicate:

you will be notified as to numbers and times at which the person(s) may usually be reached at school by telephone.

IMPORTANT: Please discontinue this request as of the following date.

Month Day Year

After this date, changes or continuance of these arrangements must be secured by filling out a newly dated copy of this form.

Signature _____ Address _____ Telephone No. _____ Date _____

MD. No. _____

Physician _____ Mo/Day/Yr _____

Parents' or Guardians' Full Name Mo/Day/Yr

Parent's or Guardian's Full Name Mo/Day/Yr

SEE E 5141.21(c) FOR LEGAL PROVISIONS AND SUGGESTIONS FOR SCHOOL PROCEDURES.

SIGNATURES OF BOTH PARENTS OR GUARDIANS ARE NECESSARY IF THEY ARE LIVING WITH OR HAVE CUSTODY OF THE CHILD.

Background Information

LEGAL PROVISIONS

The purpose of allowing medication to be given to students by authorized school personnel is to help provide for their general welfare by following the instructions of their physicians. This position is clarified by the intent seen in the following sections from the Nursing Practice Act (Chapter 6 commencing at Section 2700) Division 2 of the Business and Professions Code):

NURSING OR MINISTRATIONS NOT PROHIBITED BY CHAPTER

"The performance by any person of such duties as required in the physical care of a patient and/or carrying out medical orders prescribed by a licensed physician: provided, such person shall not in any way assume to practice as a professional, registered, graduate or trained nurse." (Business and Professions Code Section 2727 (e)).

PRACTICES UNAUTHORIZED

"This chapter confers no authority to practice medicine or surgery." (Business and Professions Code 2726)

SUGGESTIONS FOR SCHOOL PROCEDURES

The procedures covering medication brought to school to be taken by students according to the provisions listed on the preceding form will be expedited if the following procedures are used:

1. Two copies of the form are supplied: one for the school files and one for the person authorized to administer the medication.
2. Only medication prescribed by the student's physician as being necessary to be taken by the student in the manner listed on this form should be brought to school.
3. Such medication should be taken by the student in accordance with instructions from the physician listed on this form.
4. Medication brought to school to be given to the student according to the provisions listed on this form should be in containers which are clearly marked with the name of the student; the name of the prescribing physician; an identification number or name of the medication; the druggist who dispensed the medication or the manufacturer; and the amount of medication to be taken at specified times or in specific situations.
5. All medications should be kept in a secure place. Any special instructions for storage or security measures of any medication should be written by the physician and given to school personnel so that such instructions can be followed.
